

E H R Forums

The Paperless Future.....Today!

Thank you for your interest in the E H R Forums. These forums are designed to give you an overview of the products that will assist you in becoming a paperless office. They are FREE as long as your Customer Care Agreement is current.

In order for you to have a “Hands On” experience, the Forums are held in computer-equipped training facilities. Topics discussed will be an **overview**. For in depth training, please consider other training options. If you have not done any type of customization, you may want to take the Pre Recorded Classes via Webex before attending.

Agenda:

New Electronic Products Overview/E H R Overview

Web Registration –

An overview of this optional module will be presented and a live demonstration will follow. Users will understand how this module can provide significant efficiency benefits, save time for your patients, and dramatically reduce the time spent updating patient information upon arrival at your office.

Web Hosting-

An overview of this new service - which is nearing general release - will be presented. Users will understand how this service works with the Web Registration module and can help users avoid the costly expense of creating / modifying their own web site to support Web Registration functionality.

Web Based Appointments –

This is a new service that is still in the design phase and an overview will be presented. Users will be encouraged to provide feedback on how this new service might operate to best serve them.

Business Services –

An overview of this complete package of Revenue Cycle management services that will be available later this year will be presented. Users will understand how these new services might assist them with any or all aspects of managing their revenue cycle.

E H R Overview –

Instructor will be demonstrating the functionality of the Electronic Health Records (EHR) in our newest version. This will be a demonstration of how to use EHR to add and secure patient medical records as well as auto-post charges to the ledger based upon the level of examination provided.

Test Ordering and Management –

Instructor will demonstrate how to enter and manage tests within the patient exam record.

E Prescribing –

Instructor will teach an overview of E Prescribing. With this basic demonstration, you will learn how to E Prescribe. You will also learn how to set up the necessary tables. You will be taught how to maneuver within the New Crop website. You will be trained how to add an RX, renew an RX, and enter other medications the patient is currently taking. Adding allergies, pharmacies, and insurance companies to the patient within New Crop will also be covered.

Customization Overview

Screen Builder –

Instructor will present an overview of the Screen Builder Tool used to modify and create new screens or layouts. This basic instruction will teach you the functions of the Screen Builder Tool. You can follow along to make simple additions, moves, and deletions and then learn more advanced functions like creating fields in modify database, creating grids, radio groups and adding an item to the Codes tab.

Filtered Grids –

Instructor will teach an overview of Filtered Grids, show an example, and demonstrate how to create a simple Filtered Grid.

Smart Events –

Instructor will present an overview of Smart Events and help you gain an understanding of Smart Field Scripts. This basic instruction will teach you how to create a simple smart script of opening a document with a button, then progress to a more difficult smart script of auto populating a check box on the Codes tab.

Print Designer –

Instructor will show you an overview of Print Designer. Print Designer was designed to simplify converting screen layouts to print layouts. You will see only a brief overview of the functions because they mimic the Screen Builder Tool. Your Instructor will explain items that are unique to Print Designer, and demonstrate how to convert a screen layout to a print layout.

Word 2007 –

Instructor will give you a quick overview of how to integrate Word 2007 with the Compulink Advantage System. This portion will just be a demonstration. You will then be shown how to utilize the Word 2007 interface by creating a simple letter with merge fields. The instructor will then demonstrate Attributes within Microsoft Word and how they can be beneficial to you when creating documents.
